

SaferAir Chlorine Dioxide Generator– ReliOx – End Users

Trans/Air Mfg. is proud to announce that ReliOx, the manufacturer of the Whiff! chlorine dioxide generator, has appointed Trans/Air as the exclusive distributor of the Whiff! System in the transportation industry. Together with ReliOx and their Whiff! System, Trans/Air is adding the capability of chlorine dioxide to its arsenal of vehicle hygiene and maintenance products.

The [Whiff! System](#) has been developed through research conducted at the University of Florida for the Department of Defense. The Whiff! System by ReliOx is currently under review by the EPA as a hard surface antimicrobial and List N addition. The Whiff! Systems is believed by ReliOx to be the safest way to unlock the power of chlorine dioxide for the transportation industry and is available through Trans/Air now.

ReliOx has provided the following information concerning the Whiff! System:

Chlorine Dioxide

- Safe to hygienically clean most surfaces
- Currently used in food processing and water treatment facilities
- Great coverage – it is a gas and gets in all areas we typically can't reach with a towel
- Non-persistent – leaves zero residue
- Environmentally friendly

Safe

- No PPE Required to operate equipment
- No mixing of chemicals
- No harsh odors

Economical & Fast

- Maximum effectiveness with least amount of product needed
- Treat a 40' school bus in two minutes at the cost of \$3
- Treat 1000 sf in five minutes at the cost of \$10 or less

Easy to Use

- Make chlorine dioxide fresh on demand as needed
- No advanced training required – intuitive design
- Simple - One button operation
- Flexible...each unit can support multiple dispensing devices
- Use ReliOx Hi Performance Fogger or sprayer to dispense chlorine dioxide
- No wipe down necessary - simply fog and go

Multi-purpose

- Treat vehicles between shifts, before & after scheduled maintenance, and before Pre-delivery
- Treat office, shop facilities, classrooms, locker rooms

The above and all linked information has been provided by ReliOx Corporation, which is the manufacturer of the Whiff! Model 3.8 System and its components. Trans/Air is not responsible for that information or for claims with respect to the ReliOx products, whether warranty or otherwise. Trans/Air is not authorized by ReliOx to make any warranties concerning ReliOx products, and is not responsible for the application, performance or failure of performance of the ReliOx products.
